In 2015 Motonautica Fratelli Ranieri will launch 5 novelties including a ribs range and two fishing boats

by Luciano Pau

Unlike many of our politicians the entrepreneurship seems to love facts much more than words, so as usual Ranieri International stands by the effectiveness of its action by proposing five "novelties" for the next season.

The real novelty is the debut of the yard in the ribs field, a sector that the company long studied before starting the production.

The Ranieri International Ribs Division is a part of the Cayman range and includes three models, one of which with two different layouts, so four in all.

The smaller one is the Cayman 19 Sport, a rib of about 6 m in length, featured with a lot of accessories available in the base version too and built, like the whole Cayman range, with important technical devices, such as counter lockers equipped with gas pistons, tapered tubulars at bow and space on board for fun get-togethers or sun-bathing.

It can be equipped up to 150 Hp, but it has good performances also with a 40 Hp engine.

The Cayman 21 Sport is 6.45 m long, a bit bigger than the 19, but trailerable even if inflated. It has a leaning post as the driving seat and can be equipped up to 175 Hp.

The third novelty is the Cayman 23 which is featured in both Sport and Sport Touring versions with a toilet/changing room inside the driving console. It is 7 m long and can be powered up to 250 Hp. The new models have been

The new Cayman range includes Rib boats from 19 to 23 feet with different models and layouts.

➤ Motonautica Fratelli Ranieri, holder of the Ranieri International brand, is based in Soverato, in the Calabria region. At the head of the company is Pietro together with his sons **Salvatore and Antonio**.

launched as worldwide exclusive preview at La Rochelle and Genoa Boat Shows.

All the models have a sunbathing area at bow and a modular one at aft, in addition to the hulls that best exploit the proportions to obtain fast and soft navigations with any kind of sea.

The other two new additions are two fishing boats which enlarge the fisherman range, so far taken up by the CLF models (Cruise Luxury Fishing).

These are the Predator 222 and the Interceptor 222.

The first is a cabin with two berths at bow, the second an Open Center Console.

Both models are fitted with a lot of devices which are really appreciated by anglers such as oxygen tanks for live fish, tanks for the fish, holders, T-Top and side folding sofas.

They can be equipped with one or two outboard engines and are able to be very fast and soft even on rough sea.

With a 175 Hp engine they can reach a top speed of 33 knots.

The cockpits are wide enough to fish together with friends or to use as relaxation areas.

The Ranieri International list, which includes 36 models, is now enriched by two boats for anglers and four ribs.
